 No 180(3), perumal kovil street,
paruthimeni kuppam, thandalam,
Tiruvallur - 601102

CAREER OBJECTIVE:

To begin my career as a Civil Engineer by applying my knowledge of structural analysis, construction planning, and site management while gaining practical experience in real-world infrastructure projects.

EDUCATION:

06/2023 – Present Tiruvallur, India	B.E Civil engineering, R.M.K Engineering College 7.83(CGPA) Upto 5th semester
06/2022 – 05/2023 Uthukottai	12 Tamil Nadu State Board, Sri sankara matric Hr.sec school, thandalam- 601102 78.67%
06/2020 – 05/2021 Uthukottai	10 Tamil Nadu State Board, Sri sankara matric Hr.sec school, Thandalam 601106 100% (CGPA 10.0)

SKILLS:

SOFTWARE

Autocad, Revit, sketchup, staad pro

WEB DEVELOPMENT LANGUAGES

HTML, CSS, JavaScript

ACHIEVEMENT AND AWARDS:

08/01/2026	L&T Edutech: BIM Contest (Excellence Award in Commercial building category), L&T Edutech Won the Excellence Award in the L&T EduTech – Build the Future BIM Contest 2025 under the Commercial Projects category as part of Team Revit Shapers from R.M.K. Engineering College. Contributed to the BIM design and development of a G+9+Terrace commercial building with coordinated architectural, structural, and MEP models, including clash detection, LCA integration, and digital twin-ready planning.
17/04/2025	Second Prize in the Build and Decor event, Meenakshi Sundararajan Engineering College (WAFES 2025 Symposium) Secured Second Prize in the Build and Decor event at WAFES 2025 , a national-level symposium hosted by Meenakshi Sundararajan Engineering College, demonstrating creativity, teamwork, and innovative problem-solving in design and construction-based challenges.
19/12/2025	First prize in modelmania, Build our bharat 2047- (Chennai Institute of Technology) Secured First Prize in ModelMania at the Build Our Bharat 2047 competition conducted by Chennai Institute of Technology for presenting a 10-storey commercial office building model, demonstrating conceptual planning, spatial organization, vertical circulation, and design feasibility.
20/09/2025	First Prize in Paper Height, Vellamal Engineering college - (INZNIK 2K25 Symposium) Secured First Prize in the Paper Height event at INZNIK 2K25 Symposium conducted by Vellamal Engineering College by designing a paper tower capable of sustaining a 10 kg load without deformation, demonstrating structural planning, teamwork, and problem-solving skills.

Area of Interest

- Geospatial Analysis using GIS & Remote Sensing
- BIM modeler

PROJECTS:

Livestock cattle tracker

Developed an IoT-based Livestock Cattle Tracker using Arduino Nano, GPS/GSM modules, Flask, HTML, and CSS for real-time cattle monitoring. Implemented geofencing alerts, web-based tracking, and prototype hardware to improve livestock security and management. Designed and tested the system for accurate location tracking, theft prevention, and remote monitoring applications.

Digital Twin using Revit and ArcGIS pro:

Developed a digital twin-ready BIM framework for a G+9+Terrace commercial office building located in Avadi, Tamil Nadu, integrating architectural, structural, and MEP models with asset-based data management. The project incorporated life cycle assessment (LCA), clash detection, quantity schedules, and coordinated construction documentation to support sustainable and data-driven building management.

CERTIFICATIONS:

- Ground improvement (NPTEL)
- Gps surveying (NPTEL)
- AutoCAD 2023 MasterClass (Udemy)
- Exploring AutoCAD Civil 3D-Tutorials from Basics to Advanced (Udemy)
- BIM- Revit Architecture Full Course (Udemy)
- Revit- Mass Modelling (Udemy)
- Exploring Autodesk Revit for Structure BIM Tutorials (Udemy)
- Design and Analysis of RCC Structures (Bentley)

INTERNSHIP

06/2025 – 06/2025
Chennai

Different Phases of Construction of a residential building

2 weeks on Hari sai construction This internship report documents a 15-day practical training undertaken at Hari Sai Construction, Chennai, focusing on real-time construction and renovation activities. It covers hands-on exposure to soil testing, roof and staircase concreting, reinforcement works, curing methods, damp-proof painting, renovation procedures, and masonry works across multiple sites. The report highlights site execution practices, material handling, quality control measures, and on-site problem-solving during challenges such as rain- affected concreting and moisture-induced wall defects. Overall, it demonstrates the application of civil engineering theory to field practice, strengthening technical, supervisory, and construction management skills.

Declaration

I hereby declare that the above information is true and correct to the best of my knowledge and belief.
