 No 180(3), perumal kovil street,
paruthimeni kuppam, thandalam,
Tiruvallur - 601102

CAREER OBJECTIVE:

To begin my career as a Civil Engineer by applying my knowledge of structural analysis, construction planning, and site management while gaining practical experience in real-world infrastructure projects.

EDUCATION:

06/2023 – Present Tiruvallur, India	B.E Civil engineering, R.M.K Engineering College 7.83(CGPA) Upto 5th semester
06/2022 – 05/2023 Utthukottai	12 Tamil Nadu State Board, Sri sankara matric Hr.sec school, thandalam- 601102 78.67%
06/2020 – 05/2021 Utthukottai	10 Tamil Nadu State Board, Sri sankara matric Hr.sec school, Thandalam 601106 100% (CGPA 10.0)

SKILLS:

SOFTWARE

Autocad, Revit, sketchup, staad pro

WEB DEVELOPMENT LANGUAGES

HTML, CSS, JavaScript

ACHIEVEMENT AND AWARDS:

08/01/2026	L&T Edutech: BIM Contest (Excellence Award in Commercial building category), <i>L&T Edutech</i> Designed a ten-storey commercial office building using Autodesk Revit to integrate architectural and structural systems within a coordinated BIM model. The RCC framed structure with shear walls complies with NBC 2016 and relevant IS codes. The project emphasizes climate-responsive design, occupant comfort, and sustainability through rooftop solar panels, natural ventilation, energy-efficient lighting, and recycled materials. Deliverables included detailed drawings, schedules, and 3D visualizations, demonstrating efficient and industry-focused BIM workflows.
17/04/2025	Second Prize in the Build and Decor event, <i>Meenakshi Sundararajan Engineering College (WAFES 2025 Symposium)</i>
19/12/2025	First prize in modelmania, Build our bharat- (Chennai Institute of Technology)
20/09/2025	First Prize in Paper Height, Vellamal Engineering college - (INZNIK 2K25 Symposium)

PROJECTS:

Livestock cattle tracker

Small- and large-scale livestock farmers face challenges in effectively monitoring cattle health and location due to manual supervision and expansive grazing areas. This IoT-enabled cattle tracking system integrates smart wearable devices to provide real-time monitoring of location, body temperature, and activity through a centralized mobile or web application. The solution enhances early disease detection, reduces livestock loss and labor dependency, and improves overall operational efficiency in livestock management.

CERTIFICATIONS:

- Ground improvement (NPTEL)
- Exploring AutoCAD Civil 3D-Tutorials from Basics to Advanced (Udemy)
- Exploring Autodesk Revit for Structure BIM Tutorials (Udemy)
- Gps surveying (NPTEL)
- BIM- Revit Architecture Full Course (Udemy)
- Design and Analysis of RCC Structures (Bentley)
- AutoCAD 2023 MasterClass (Udemy)
- Revit- Mass Modelling (Udemy)

INTERNSHIP

06/2025 – 06/2025
Chennai

Different Phases of Construction of a residential building

2 weeks on Hari sai construction This internship report documents a 15-day practical training undertaken at Hari Sai Construction, Chennai, focusing on real-time construction and renovation activities. It covers hands-on exposure to soil testing, roof and staircase concreting, reinforcement works, curing methods, damp-proof painting, renovation procedures, and masonry works across multiple sites. The report highlights site execution practices, material handling, quality control measures, and on-site problem-solving during challenges such as rain- affected concreting and moisture-induced wall defects. Overall, it demonstrates the application of civil engineering theory to field practice, strengthening technical, supervisory, and construction management skills.

Area of Interest

- Geospatial Analysis using GIS & Remote Sensing
- BIM modeler

Declaration

I hereby declare that the above information is true and correct to the best of my knowledge and belief.
